Markus Zimmermann “Superfiliale”

Markus Zimmermann as operator of the exhibition format „Superfiliale“ presents a multifunctional wall in the homonymous exhibition. The installation changes appearance, function and character just like a chameleon changes its colour: from the cool display of a trade fair to the pragmatic classification system and back. The observers are invited to make use of the installation and respective objects in order to create the artwork collective.

contains reception of „Karmaspin“

! Declaration !:

You own things that trouble you big time or just a little?
Bills, written letters that were discontinued, objects that, even tho charged with the memories of something horrible, you still can't throw away.
Things symbolizing conflicts, thoughts that suck?

Just in time for Easter and obliged to an eastern spirit Markus Zimmermann will free these objects and their symbolic content from any negative energy.

Please feel free to hand in the objects from 2 to 8:30 pm at the reception of Superfiliale.
Thoughts may be written on slips of paper.

The ritual starts at 9 pm prompt and will take 30 minutes. You may take the objects away immediately afterwards or the next day.
